### Readout Mounting

When a TPL-9 Turbo-Meter is ordered with a horizontal direct reading index, the assembly shown at the left will be mounted on the meter. ALL other readout devices, including integrating or recording gauges, require mounting of index plate assembly 006-20-504-02 on the face plate of the intermediate gear housing. This index plate is pre-drilled to accept mechanical indexes, integrating or recording gauges. Additionally, for horizontal sets, the index plate will accept the 90° goose-neck shown below to position the gauge properly.

The 90° goose-neck adapter for TPL-9 Turbo-Meters of any working pressure is: Part Number 006-22-407-00.
